OUR RUNNING CHEETAHS

The majestic African cheetah is known for reaching speeds of 112 kph [70 mph] in short bursts, but it doesn't do so well over distances. It has been reported that four members of a northeast Kenyan village actually outran two cheetahs in a 4 mile footrace. It seems that two large cheetahs had been feeding on the village goats. So the four men came up with a plan to stop them. They waited until the hottest part of the day and then gave chase to the cats, tracking them down when the animals couldn't run any further. The exhausted cheetahs were safely captured and turned over to the Kenyan wildlife service for relocation. Can we see ourselves in the cheetahs? Our strengths might seem impressive, but they can often be short-lived. In the bible the prophet Isaiah reminds us, we are like wildflowers that soon wither under the heat of the sun. Do you sometimes feel like this? The pressures of life just become too much and you feel as if you don't have the strength to carry on, you feel that there is no hope. It is when we feel we have reached the end of our strength and ability to cope that God offers us comfort and hope. In His time and ways, He can renew our strength. By His Holy Spirit He can enable us to rise up on "wings like eagles" or to run and not grow weary, to walk and not grow faint. It is when we draw nearer to God that our minds are refreshed and our strength is renewed. Doreen
